R-studio workshop

# Nice to meet you!

**Ioana Frîncu**

- 3rd year CS student
- Programming since I was 14
- Loves pretty graphs

Flifenstein

**Wouter Stoter**

- 2nd year CS student
- 8 years of programming experience
- A PowerPoint lover

```

# Function

```
> pwn <- plank %>% hammer(nail) %>%  
>   screwdriver(screw)
```

# Function

```
> ?read.csv
```

## Data Input

### Description

Reads a file in table format and creates a data frame from it, with cases corresponding to lines and variables to fields in the file.

### Usage

```
read.csv(file, header = TRUE, sep = ",",  
quote = "\"", dec = ".", ...)
```

### Arguments

<i>file</i>	the name of the file which the data are to be read from.
<i>header</i>	a logical value indicating whether the file contains the names of the variables as its first line.
<i>sep</i>	the field separator character
<i>quote</i>	the set of quoting characters.
<i>dec</i>	the character used in the file for decimal points.

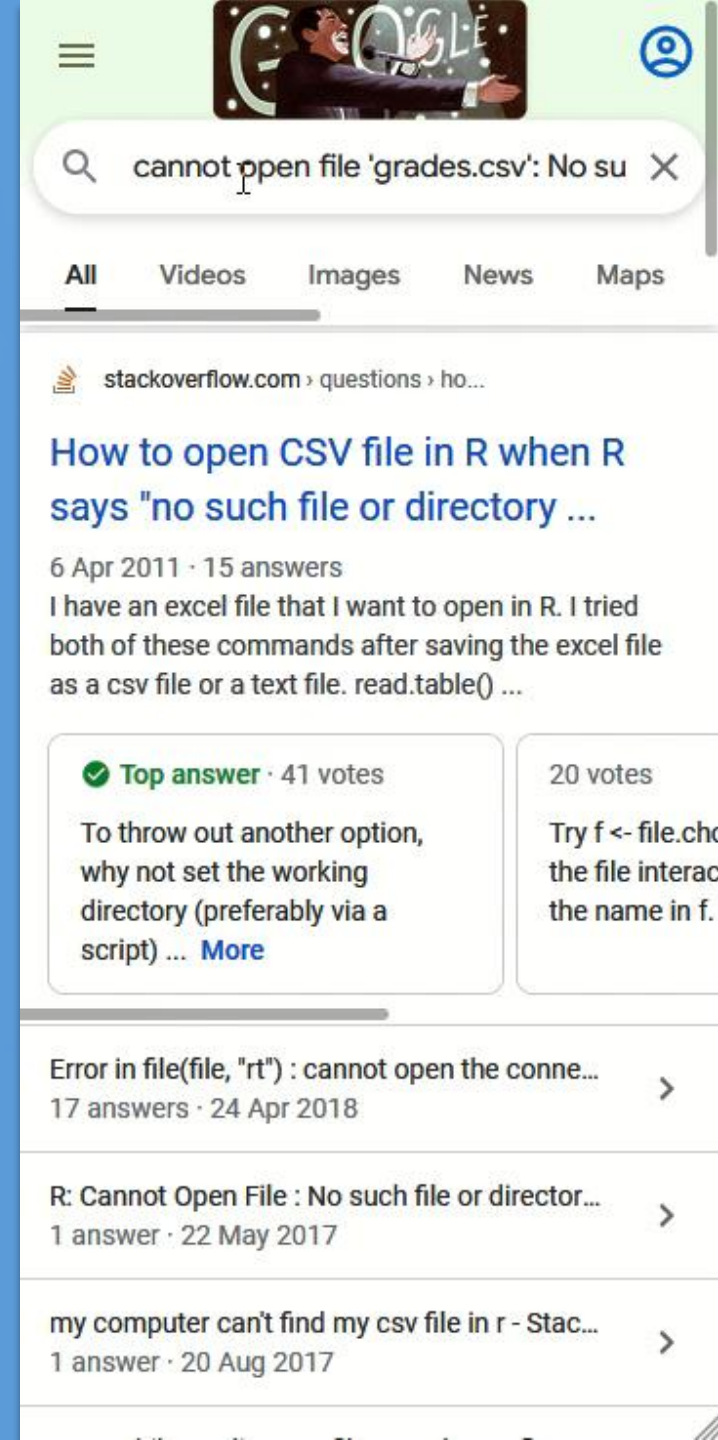

### Examples

```
read.csv(tf, fill = TRUE)  
ncol <- max(count.fields(tf, sep = ",",  
read.csv(tf, fill = TRUE, header = FALSE,  
          col.names = paste0("v",  
seq_len(ncol)))
```

# Function

```
> grades <- read.csv("grades.csv")  
cannot open file 'grades.csv': No  
such file or directory
```

# Function

```
> setwd("C:/users/wouter/downloads")  
> grades <- read.csv("grades.csv")
```

# Function

```
> setwd("C:/users/wouter/downloads")  
> grades <- read_spss("grades.sav")  
could not find function "read_spss"
```

# Package

```
> install.packages("haven")  
> library(haven)
```
